

Oghenetega Akpowenre

Software Developer

Lagos

oghenetegaakpowenre@gmail.com

+234 817 037 6604

Hi there! My name is Oghenetega Akpowenre, and I hold a degree in Computer Science from the University of Benin. Currently, I am employed as a core programmer at Union Bank. In the past, I have gained valuable experience working as a React Developer for a software development company, and I have completed internships at a pension company and an internet service provider.

My expertise lies in front-end development, and I take pride in my strong command of HTML, CSS, React, and various other front-end tools. Additionally, I am well-versed in C# and ASP.NET. As an individual constantly seeking self-improvement, I am always on the lookout for new challenges to further enhance my skills.

If you're interested in viewing some of my work, please feel free to visit my personal website at [otega99.github.io]. Thank you for taking the time to review my CV!

Personal Details

Date of Birth: 1999-12-29

Industry: Software Development

NYSC Status: Completed

Work Experience

Core Programmer

Union Bank of Nigeria - Lagos

June 2023 to Present

- Presently, I am actively involved in the development of an in-house vulnerability management web application. This project aims to enhance our organization's ability to manage and address vulnerabilities effectively.

Executive Trainee

Union Bank PLC Nigeria - Ikeja, Lagos

April 2023 to June 2023

- Successfully completed an NIIT boot camp, which was generously sponsored by my company. During the boot camp, I gained valuable knowledge and skills that have enriched my expertise and contributed to my professional growth.

Front End Developer (React)

Spearhead Software Solutions Limited - Lagos

February 2023 to April 2023

- Developed an admin portal using React for a leading firm offering currency trading and exchange services.

- Additionally, collaborated on app development for the same firm utilizing HTML, CSS, Javascript and Cordova.
- Designed and executed an admin portal for a reputable real estate company utilizing React and hosted it on Firebase.
- Spearheaded the redesign of the company website.

Intern

Cyberspace Limited - Lagos
August 2019 to January 2020

- Developed an API for handling user login and signup which was implemented in the back-end logic of a banking application being developed by the company.
- Contributed to the development of an advert management software called Publicité. My specific role was to develop a middleware which determined if a user was attempting to access an expired database and if so deny the user access to the database and notify him/her of the database status, with an email using the SendGrid API.
- Supervised the repair of a damaged company server.
- Supervised the transfer of sensitive company equipment from one branch to another.

Intern

Radix Pensions Managers Limited - Lagos
July 2018 to September 2018

- Assisted in the training of the marketing department on the use of a data-capture device.
- Supervised the installation of an inverter and a broadband satellite dish.
- Addressed system connectivity issues.
- Created and edited sensitive documents and financial spreadsheets.
